Learning For Life

everyone's family

Our mission: To create opportunities for young Australians in need by providing long-term support for their participation in education.

In Australia today, more than 638,000 children* are living in jobless families. For these children, the effects of their family's financial disadvantage go beyond the pressures of not having enough money for the basics; it can prevent them from accessing the same educational and life opportunities as their peers.

The Smith Family believes that every child deserves a chance and that circumstances should never limit the achievement of potential. With research showing that education has the power to transform lives, not just minds, the national charity's Learning for Life program enables disadvantaged children and young people to get the opportunities they need to fully participate in their education and create better futures for themselves.

In 97 communities across Australia, **Learning for Life** connects students to sponsors whose financial support helps families afford the cost of their children's essential school items such as uniforms, text books and school excursions. The charity also links disadvantaged young people to local learning opportunities as well as a range of learning support and mentoring programs.

The Smith Family's work is evidence-led and strengthened by a network of strong partnerships with organisations as well as individual sponsors, donors and volunteers, including the 20,000 members of VIEW Clubs of Australia.
